

Student Chapter Summit – Niagara on the Lake

MCA Hamilton-Niagara hosted their educational forum January 30th to February 1st, 2020.

This year's program took aim at looking into the future of the construction industry, technological advancements, career choices, as well as provided the opportunity to collaborate with fellow attendees in a mini competition. This year's Team Sponsor was WESCAN.

This year the Construction Education Council brought in TED Talk speaker, Chris Cummins, who presented an inspiring presentation.

The Summit was topped off with an onsite visit to Niagara Falls and a second site visit to Great Wolf Lodge Water Park. There were also several networking opportunities between the students and contractors.

MCAM brought eight students from the Local Student Chapter to this event.

Special thanks goes out to Eastside Ventilation, who was the Hospitality Sponsor for the Student Chapter Summit this year.
